

Assignment: Create a Model of the Solar System

Objective

The purpose of this assignment is to understand the structure of the solar system by creating a physical or digital model.

Introduction

The solar system consists of the Sun and all celestial bodies that orbit around it. The planets are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.

Materials Required

- 1 Thermocol balls / clay / paper balls
- 2 Paints or colored paper
- 3 Cardboard or chart paper
- 4 Glue and scissors
- 5 Sticks or thread
- 6 Marker or pen

Procedure

- 1 Plan the model (2D, 3D, or digital).
- 2 Create the Sun at the center.
- 3 Make planets with different sizes and colors.
- 4 Arrange planets in correct order.
- 5 Label each planet.
- 6 Add extra details like asteroid belt (optional).

Observation

Planets are arranged in order, inner planets are smaller, and outer planets are larger.

Conclusion

This project helps visualize the solar system and improves creativity.

Evaluation Criteria

Accuracy, creativity, labeling, and presentation.
